It also seems Creative is no longer supporting these old cards with new driver updates.. Are there any driver solutions? For anyone who has an old Sound Blaster Live or similar soundcards laying around, I found a development project for drivers for these older cards and many others that Creative has chosen to drop support of long ago (2003).. Matter of fact, their website claims that they support KX-compatible soundcards including all EMU10k1 and EMU10k2-based PC soundcards manufactured by Creative Technology Ltd.. So I would like to keep using it if possible Download wallpaper gerak dan keren.. I love the card though Installing the Software – Operates on Windows operating system.
